

Medical Staff Survey

- ❖ How often do you see cases surrounding domestic violence issues?
- ❖ How often do patients presenting with one injury/medical symptom also have evidence of domestic violence indicators?
- ❖ What kind of safety risks do you experience when responding to domestic violence situations?
- ❖ What personal frustrations do you encounter with these cases?
- ❖ What obstacles do you encounter when responding to a domestic violence call? Do you have specific protocols you follow?
- ❖ What cultural barriers are there for officers responding to domestic violence calls?
- ❖ How do you view the community's attitude towards domestic violence?
- ❖ Where are gaps in services?
- ❖ What is important from the medical personnel perspective on domestic violence?
- ❖ How does data privacy affect how you respond to victims of domestic violence?
- ❖ What kind of training have you received surrounding domestic violence?
